**WORK EXPERIENCE**

<b>Dates Employed</b>	<b>Job Title</b>	<b>Company</b>
4/2006 - Present	<b>Technical Director</b>	 Open Peers Ltd Bierton/Buckinghamshire
	Part time work as a Technical director for a small ISP. Here i am involved in establishing connectivity to exchangepoints and negotiating peering and handling provisioning of BGP sessions. I also designed and implemented a global loadbalanced content delivery network (CDN).	
1/2005 - Present	<b>Manager/Owner</b>	 Infotropic AB Stockholm/Stockholm
	Working as an consultant and managing director for a small ASP with mainly corporate customers.	
11/2002 - 12/2003	<b>Technical director</b>	TerraBee Systems AB Stockholm/Stockholm
	At TerraBee i was responsible of establishing a data center and the infrastructure for their server hosting business, which amongst other things involved setting up BGP peering with other operators and exchange points.	
5/1999 - 10/2002	<b>Manager Unix group</b>	Xpedio AB Stockholm/Stockholm
	Designed and implemented a fully redundant mail system without any single point of failure, scalable up to millions of users with a dynamic LDAP backend for provisioning services. I was also the manager of the UNIX backend team consisting of 13 employees and had a seat in the corporations steering committee.	
7/1998 - 10/1999	<b>Network Guru</b>	Bahnhof Internet AB Stockholm/Stockholm
	I participated in growing Bahnhof Internet from being a small dialup provider to become a fullservice ISP with their own server hosting and backbone. During this period i got extensive knowledge in working with BGP and working together with RIPE. My technical responsibilities covered everything an ISP needed from radius handling dialup customers to web servers and cisco routing. But i also was involved in sales, product development and R&D. The job title "Network Guru" was actually printed on my business cards to reflect this fact.	
7/1996 - 9/1998	<b>Senior Unix &amp; Tcp-ip consultant</b>	Network Management AB Stockholm/Södermalm
	At Network Management i was working as a full time consultant. I was primary working with network security designing and implementing firewalls and tcp/ip networks. But general Unix consulting took a share of my time. I also developed training materials and regulary held courses in this field.	
7/1994 - 8/1996	<b>Unix &amp; Network engineer</b>	Dexpert Data AB Stockholm/Bromma
	In the beginning i was mainly in charge of supporting 3'rd part accessories and harddrives for a diverse range of Unix systems. But later i concentrated mainly on Xyplex terminal servers and routers. Both pre and post sales consulting and support. Participated a lot in interoperability testing of OSPF inbetween Xyplex and a diverse range of other manufacturers routing equipment..	
5/1993 - 11/1995	<b>Senior network consultant.</b>	NetTime AB Stockholm/Stockholm
	At this position i began doing tcp/ip and firewall consulting, but this evolved into consulting with and being a evangelist for the WWW.	
7/1990 - 7/1993	<b>Unix (sunOS/Solaris) engineer</b>	Dimension Data AB Bromma/Stockholm
1/1989 - 12/1989	<b>Unix consultant</b>	Unique Systems AB Gothenburg/Gothenburg
	Independent consultant in networking and Unix systems administration.	

11/1985 - 6/1988	<b>Technician/Programmer</b>	Chalmers University of Technology Gothenburg/Gothenburg
		Development of an data collection/analysis system but also Unix system administration and tcp/ip networking.
6/1983 - 7/1985	<b>Programmer</b>	Nanco Elektronik Henån/Orust
		Programmer mainly developing applications and system software for the Luxor ABC80/800 computers, but also some work under Unix on Wicat systems.
4/1981 - 1/1983	<b>Television repairs</b>	Henåns Radio & Tv Henån/Orust
		Worked as a technician repairing television sets etc. Also standby for handling sales in the shop.
